

John T. Greeves has been a Senior Regulatory Safety Consultant to Talisman International since retiring from the U.S. Nuclear Regulatory Commission (NRC) as Director, Division of Waste Management and Environmental Protection.

He directed the Commission's program for licensing, inspection, and regulation to assure safety and quality associated with the management, treatment, and commercial disposal of low-level nuclear waste, uranium recovery activities including mill tailings management, high level waste disposal, and material facility and power reactor decommissioning. Previously he managed the NRC's program for licensing and inspection of industrial, medical nuclear facilities, and fuel fabrication facilities.

Greeves was NRC's representative to the IAEA Waste Safety Standards Advisory Committee and participated extensively in the development of the Joint Convention on the Safety of Spent Fuel Management and on the Safety of Radioactive Waste Management. In 1993 and 2001, he received Presidential Meritorious Rank Awards.

Before joining the NRC in 1974, he worked for Bechtel Power Corporation on the design and construction of nuclear power plants.

Mr. Greeves is a registered Professional Engineer and a member of the American Society of Civil Engineers and the Health Physics Society. He holds a Bachelor of Science in Civil Engineering from the University of Maryland. He completed Graduate Studies in groundwater analysis at the University of Maryland and in Business Management at Golden Gate University.
