

Richard Nishimura received his doctorate in Electrical Engineering in 1990 and has worked in the area of safeguards and non-proliferation at Atomic Energy of Canada Limited for more than 12 years. Since 1992 he has managed AECL's safeguards program, providing technical support and expertise to the Canadian Safeguards Support Program and the IAEA for instruments such as the Cerenkov Viewing Device, as well as consulting on technical topics such as fuel cycles and heavy water.

Richard has been active in the area of proliferation resistance for the past 5 years, participating in the International Atomic Energy Agency's International Project on Innovative Nuclear Energy Systems and Fuel Cycles and co-chairing the Generation IV International Forum's Experts Group on Proliferation Resistance and Physical Protection.

Dr. Nishimura received his bachelor's degree in electrical engineering at the University of Kingston in 1981 and a master's degree in EE from the University of Toronto in 1984.
