

Ferenc L. Toth is senior energy economist with the Planning and Economic Studies Section in the Department of Nuclear Energy, International Atomic Energy Agency (IAEA) in Vienna, Austria and associate professor of the Corvinus University in Budapest, Hungary. Before joining IAEA in 2003, Toth worked at the International Institute for Applied Systems Analysis (IIASA, Laxenburg, Austria, 2001-2003). Earlier he lead several research projects at the Potsdam Institute for Climate Impact Research (PIK) in Potsdam, Germany (1993-2001), including a major international effort (ICLIPS) to develop an integrated assessment model of climate change to explore long-term climate policies.

Toth's research interests cover policy analysis for socioeconomic development and for resource, energy, and environmental management; interactions between development and environment; methods to support economic and environmental policy analysis and decision making; and mathematical and computer modeling of social, economic, and biogeophysical systems. He is working on several projects at IAEA that address various aspects of global environmental change and sustainable energy development, water and energy linkages, scenarios, and topics related to the development and use of nuclear technologies.

Dr. Toth earned his M.S. (1978) and Ph.D. (1982) in economics from the Budapest University of Economics in Hungary, and a second doctorate (1994) in economics from the Hungarian Academy of Sciences.
