

SCHOOL ON RADIATION TECHNOLOGIES 2021

11-22 October 2021 | Online

The World Nuclear University School on Radiation Technologies is a 2-week intensive leadership and communication development programme for professionals in the areas of radiation technologies and radioisotope production. The 2021 School on Radiation Technologies will be held virtually, taking full advantage of the inclusive, global nature of virtual programmes.

It will feature:

- Expert-led technical tours of global vanguard facilities
- Dedicated mentorship and working groups focusing on fostering innovation, leadership and communication skills
- Presentations by foremost industry leaders
- Extensive structured networking opportunities
- Lectures by prominent experts in radioisotopes and radiation technologies

Fellows of the programme will receive a certificate for successful attendance and will join the WNU RT School Alumni Network.
